What I'm good at?

From mastering programming languages to navigating complex systems, my expertise extends across various domains. Below, you'll find a curated list detailing my key strengths and proficiencies, each contributing to my ability to tackle challenges with precision and creativity.

Machine Learning
Diverse algorithm implementation, regression, classification, and clustering tasks using frameworks like scikit-learn and TensorFlow.

Research
Leveraging advanced econometric tools and statistical software to analyze complex data and derive actionable insights.

Finance
Expertise in derivatives, risk management, and valuation, navigating complex financial instruments and effectively manage portfolios.

Statistics
Strong foundation in statistics, with proficiency in hypothesis testing, regression analysis, and probability theory.

Ananya Mohapatra
Quant Researcher
